## Speaking & Guest Lecturing Services

Presentations and guest lectures focus on how pedestrian infrastructure is interpreted and navigated from a nonvisual perspective, bringing together standards, design intent, and real-world experience. Sessions are designed to support informed decision-making in both design and implementation.

### Signature Presentations

#### **Seeing the Intersection Differently: A Look From Behind the White Cane**

A foundational session on how blind pedestrians interpret intersections, signals, and environmental cues

#### **How Vision Zero Can Put Zero Vision Pedestrians at Risk**

Explores unintended consequences of pedestrian safety strategies within the framework of nonvisual navigation

### Guest Lectures (University)

Available for:

- Civil and transportation engineering programs
- Urban and landscape design programs
- Blind Orientation & Mobility programs
- Disability studies programs

Lecture formats include applied examples, case-based discussion, and real-world scenarios.
